

What is it that makes today's student induction so different so appealing?

Using geocaching and mobile apps for icebreaking.

Using social media to support arrival and integration into Higher Education can be innovative. Media Arts and Communications staff have tested out processes in partnership with students and are continuing to try different ideas. A digital treasure hunt begins with ParaShoot an on-line safety training registration

Students groups are asked to upload free Apps that work on mobile smart phones. They are given clues that require them to move around the university and environs to find out about facilities, orientate themselves and make new friends. They upload their outcomes a site to share with students and staff who can

view, comment and even vote on the results.

This process uses the mobile technology that students are comfortable with and encourages them to explore and engage with university.

We have an induction pack DVD of resources and ideas to share with you.
